

EFFECTIVE PEST & ANIMAL CONTROL

ROW COVERS/AGRIBON

Row covers stop all types of insects, including notorious pests such as carrot rust fly, onion root maggot and leaf miners. Also will

COLLARS

Cabbage plant collar

Close-fitting discs or toilet paper collars set around new plants will help to protect them from cutworms, slugs, and root maggot. They can also help to deter slugs and snails.

EGGSHELLS

Slugs will not try to pass over anything sharp, so eggshells or diatomaceous earth are good choices to deter them.

HANDPICKING

Caterpillar on Brussel sprouts
Vigilance and handpicking will go a long way toward protecting your crops from insect pests. Check the underside of leaves for eggs.

HOOPS AND NETTING

Hoops or other structures fitted with netting, wire or Agribon will help to deter uninvited guests.

ULTRASONIC ANIMAL REPELLER

Blasts a range of ultrasonic sounds and flashing LED strobe lights to scare away a wide variety of pests.
